Module_One (Week 1)

To-Do Date: Jan 30 at 11:59pm

Welcome to CPSC 110

This is the first week of CPSC 110, welcome to the class! For this first week and first online module we need to cover the following topic:

1. The syllabus and how the course will work.
2. Programming and problem solving an intro, including the software lifecycle.
3. Python, what it is and how to install it.
4. Introduction to cryptography.
5. Lab #1, the first programming assignment.
6. Quiz #1, the quiz for module one.

So let's get to work.

The syllabus and Class overview:

- First you need to read the syllabus, it can be found here:

IDLE Shell 3.9.1

File Edit Shell Debug Options Window Help

```
Python 3.9.1 (tags/v3.9.1:1e5d33e, Dec  7 2020, 17:08:21) [MSC v.1927 64 bit (AMD64)] on win32
Type "help", "copyright", "credits" or "license()" for more information.
>>> print("Tom Straus")
Tom Straus
>>>
```
